

b1
Cont provisional patent application Serial No. 60/043,835 filed
4/14/97.

Please replace the description of Fig 12 with the following.

b2 Fig. 12 is an exploded perspective view of the foundation
bolt placement template of Fig.'s 11(a)-(c) showing the
installation.

Please replace appropriately numbered paragraphs with the
following amended paragraphs.

b3 [0034] Rigid structural panel 400 may include a plurality of
horizontal spacing members such as horizontal spacing members
412, 414 and 472. The addition of horizontal spacing members
412, 414 and 472 simplifies the fabrication of the rigid
structural panel by bracing first and second side members 424
and 428 and vertical supports 402 and 476 during fabrication.
The horizontal dimension of a rigid structural panel is more
consistent using horizontal spacing members 412, 414 and 472,
because a bow in first side member 424, or in second side member
428, or in vertical support 402 or 476 may be removed during
fabrication. Horizontal spacing members may be included and
secured as shown in Fig. 7.

IN THE DRAWINGS:

Please consider Figures 1A and 1B and 2A and 2B.
